Scope: L’Oréal Luxe Division

ScentMode

An AI-powered luxury “Occasion Stylist for Fragrances” that recommends the perfect perfume based on your event type, dress code, age, mood, personality, lighting, weather, music vibe, and social setting. It blends contextual data with L’Oréal Luxe’s fragrance universe to create personalized “ScentMode Profiles” such as Midnight Glam, Soft Elegance, or Electric Party Aura. ScentMode upgrades fragrance selection from a guess-based choice to a high-fashion, tech-driven personal styling experience.

PROBLEM WE SOLVE

Consumers struggle to pick fragrances for specific moments parties, dates, formal events, brunches, work settings. ScentMode turns fragrance selection into a personalized fashion decision, making luxury scent-wearing contextual, confident, and expressive.

WHY IT’S INNOVATIVE

It merges fashion logic (outfit + vibe) with AI, AR, and emotional data to create a new category: Occasion-Based Fragrance Intelligence.
